RESEARCH RESOURCES AND SUPPORT

There are a variety of research support resources at the University of Washington. We will add to this page as additional specific research resources are provided to the web maintenance staff. If you have a suggestion, please email the primary graduate section web editor (currently Liz Collier, GPA) for web additions.

MASTERS THESIS RESEARCH WEBSITE

This website is being maintained by Aimée Dechter. The site itself serves as the website for the MA Thesis Seminar, and includes information for this class (SOC 524). However it also contains information in the section "Research Support" that can be useful to first year students, as well as more advanced students.
